DC Hack-a-thon 2018

*Two sitting with laptops open, coding
* Two people at the park , shooting hoops or something
* One person going through the app as we skit

*Both   talking about coding to themselves

Person 1: Ugh, I've been coding for my lab assignment for hours. These CS professors really think that this is our only class. I need a break. I just need to clear my mind.

Person 2: Me too. This is crazy. Let's go to the park and play some sports

Person 1: But how will we know which parks have people there to play games with?

Person 2: Well… There's this new, amazing app called fourscore. It allows users to login, pick a sport and find a nearby,popular location where people are playing basketball, soccer, football, or baseball games.

Person 1: Cool. What else can the app do?

Person 2: WELL since you asked, coming soon, the app will have the ability to check in users once they arrive to their chosen location. They will also be able to view the profiles of their fellow sports people.

Person 1: WOW! AMAZING! I'LL NEVER HAVE TO SHOOT HOOPS ALONE AGAIN! LET'S GO PLAY SOME BALL.

*Leaves and goes to the park

*Exit stage
*
